**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I am a customer with Sonic that have gave to speed and right price for the internet. I am also a customer with AT&T that said they will deployed fiber internet in SF and the company keeps on saying that San Francisco will not let them build the infrastructure and will not run fiber to home where I live in San Francisco. This been going on for many years with AT&T and Comcast that have a hold on San Francisco area. In the past 4 year in San Francisco Sonic is the only company that was using the back bone of AT&T line and then Sonic start to rolled out there own fiber line in San Francisco area. This has open the speed of the internet to over 1 gig bite of internet speed. Now FCC has stop enforcing the Net neutrality laws and now this will stop the bring the inter net speed down and higher price as well. AT&T and Comcast have stop the roll out of the high speed inter net in the bay area and San Francisco as well. Sonic is the only company was at great price for the internet \$75.00 for the internet and phone line. AT&T has raised there price up on the 45mbt per second from \$75.00 and higher now and the phone has gone up as well that has raised the price over \$135.00 month to \$165.00 a month. Stop the big company like AT&T and Comcast from stopping company like Sonic from being around and rolling out better speed and better price as well. AT&T and Comcast do not want to upgrade there system or let other company from coming in any city's and stop allowing the big company from buying out other company making the choice from being large to only two companys in the whole USA.
